

## Taiwan Export Program-Orchard Codling Moth Control Worksheet

Sequential sampling table to determine if the fruit from a specific grower lot is eligible for export to Taiwan  
(i.e. damage level is greater than 0.2% or less than or equal to 0.04%)

**Stop if No. Fruit  
w/Live Larvae is:**

Tree	Above or equal to	Below or equal to	No. Fruit w/Live Larvae	Cum. no.
1	3	<b>A minimum of 21 trees must be sampled before stopping in orchards with low risk of codling moth infestation.</b>

**Sampled by** \_\_\_\_\_ **Date** \_\_\_\_\_

*This document must accompany the first load of fruit from this lot upon delivery to the packing facility. Lots that do not have documentation verifying low risk of codling moth presence are not eligible for export to Taiwan. If no decision is reached after sampling 50 trees, orchard may be resampled once in the field in no less than 7 days to verify infestation levels or once using the bin sample. If the lot does not pass following these resamples, the lot is disqualified for export to Taiwan.*
